

FLUOXETINE (20 mg/day) IRANIAN SAFFRON (stigma extract) 24 22 18 16 14 10 Trial (weeks)

Published clinical studies show that Iranian saffron extract, administered at 30 mg/day, significantly relieves severe mood troubles, in only 1 week.

The saffron efficacy has been shown to be similar to fluoxetine or imipramine, the two main pharmaceutical drugs used to treat those disorders, without any side effects.

(Crocus sativus L.)

**SARGOL** IRANIAN QUALITY

Only the purest and richest quality for Safr'Inside $^{\text{TM}}$ .
